OBJECTIVE

While my current objective is simply to finish out high school and get a job to put some money in the bank, I am motivated by the idea of a Computer Science career after college.

JOB EXPERIENCE

ASSISTANT MANAGER • LITTLE CAESARS • OCT 2, 2018 - PRESENT
Though it is unimportant to my main goal of working a career in computer science, I have thoroughly worked to achieve skills in basic team management and group coordination in my time as an employee of Little Caesars. Often in my time as an assistant manager I was forced to do many duties that would normally be the store managers job.

SKILLS

- Cash Handling
- Shift Management
- Sales
- Customer Service
- Inventory
- Coding
- Webpage Design
- Game Design
- Food Service

EDUCATION

HIGH SCHOOL • 9-10 • NORTHWEST PENNSYLVANIA COLLEGIATE ACADEMY
NPCA was a great school, and a name many colleges would recognize. I made it my home for my first two years of high school however after some not-so-great teachers who didn't care much for me began to give me trouble and my grades suffered because of it, I left to find another school.

HIGH SCHOOL • 11-12 • ERIE HIGH SCHOOL
After leaving Collegiate I came to Erie High. My Junior year started off fantastically and I came to realize that classes didn't need to be extremely difficult to be rewarding. I joined a CS Principles class with Jordan Lander, the teacher of that class, and when he realized I was way ahead of the rest of the group, he pushed me to go farther and we began many projects, the most notable being Project Vibe. However, I spent less time in class and my grades suffered. This year I'm going to try to be more school oriented.

VOLUNTEER EXPERIENCE AND LEADERSHIP

While attending Erie High school I managed a team of four people to create and design a JavaScript web-based app to achieve a goal. The result was projectvibe.org which is currently not a funded program but once had the vision to be a step in the right direction for mental health. While the app was fully built and functional, it never came to fruition.

As stated before, I worked at Little Caesars as an Assistant Manager and in my time there I have become proficient at team management and general team coordination.
